

Prestige Medical Laser

14 QUESTIONS ABOUT LASER HAIR REMOVAL

- 1. What makes your company different from other laser hair removal companies in New York?** We offer very safe AND very effective AND very affordable laser hair removal services. And, because of our business model – we offer mobile services in key marketable locations and provide lifetime guarantee services to our clients – we are able to create strong customer loyalty and offer better services at less than ½ the price charged by other major companies in the New York/Long Island area. We operate in more than a dozen popular spas in Nassau, Queens, Manhattan, Brooklyn, and the Bronx, which makes our services both accessible and affordable.
- 2. What kind of equipment does Prestige Medical Laser use?** We use the latest equipment from Cutera, the leader in safe, effective laser hair removal and the makers of CoolGlide technology. We use YAG equipment 1064 nanometer. And LightSheer diode Laser.
- 3. What Qualifications do you have?** As per New York State guidelines, every Prestige Medical Laser technician is a certified laser specialist, and has to be certified by an accredited school. Our laser specialists have a minimum of one year of service, and operate under the supervision of a physician.
- 4. Do you offer any guarantee for your services?** By law, we must guarantee 90% hair removal. In addition, Prestige Medical Laser offers our patients a lifetime guarantee – once initial treatment is completed (usually 4-6 sessions), any future annual maintenance is offered at 25% of the value of the treatment, for life.
- 5. The Cutera Coolglide** is a laser hair removal system on the market for all skin types and tones, for light to dark, including tanned patients. Its unique design, longer wavelength, and innovative cooling design, allow extremely effective, safe and permanent results.
- 6. LightSheer Diode** Laser the worlds most advanced treatment for effective removal of hair in light skin complexion. It is fast and painless. Great News for Men and women who want to get rid of excess hair.
- 7. What areas can be treated?** The can remove hair from all parts of the body including the face, legs, arms, underarms and back. It can also treat sensitive areas like the chest, nipples, and bikini line.

Prestige Medical Laser

- 8. What do treatments feel like?** As the name implies, the handpiece cools and soothes as it glides along your skin. When the pulse of light is delivered, some patients experience a mild pinching or stinging sensation. No local anesthesia or pain medication is typically required; however, some patients may prefer to use a topical anesthetic when sensitive areas are treated.
- 9. How many treatments will I need?** Most areas require 3-6 treatments. However, the number of treatments required for optimal long-term benefits depends on multiple factors – hair thickness, the area treated and your hair’s growth cycle. Interestingly, not all hairs are actively growing all at the same time, and actually go through three distinct phases. Growth, regression, and resting. Treatments work by disabling the hair that is principally in the active growth phase at the time of treatment. Since other hairs will enter this active growth phase at different times, additional treatments may be necessary to disable all of the hair follicles in a given area.
- 10. What happens after the treatment?** Immediately following your treatment, the area may appear a bit red and swollen. Three to seven days after the treatment, you may experience what seems to be regrowth of hair. Actually, most of these hairs are being shed as a result of your treatment and are not regrowing. Between treatments, you should not wax or pluck your hair, but it is permissible to shave.
- 11. Are there any restrictions on my activity after treatment?** Following the treatment, you may return to your normal activities right away, but some redness may occur. The use of sunscreen is recommended on any treated areas exposed to the sun. In addition, your physician may recommend that you use specially formulated skincare product line or prescribe a skincare regiment especially formulated for your skin type.
- 12. What are the possible side effects?** Although patients experience few side effects, the most commonly noticed are slight reddening and local swelling of the skin, similar to a sunburn. These effects typically last for several hours or less. In rare instances, blistering may occur. Consult your medical professional for complete information on the benefits and risks of treatment.
- 13. How does the compare with other hair removal methods?** Shaving, waxing, and depilatory creams are all temporary methods which must be repeated on a frequent basis. The offers permanent hair reduction for lasting results.
- 14. How does the compare with electrolysis?** Electrolysis is a tedious, invasive and painful process that involves inserting a needle into each individual hair follicle and delivering an electrical charge to them one at a time. E often requires years of treatments at regular intervals. By deliver light energy to hundreds of hair follicles at a time, the effectively treats an area in just seconds that would take over an hour with electrolysis.
